

Loyalty Node

Feature List

- Reward members in your bars, restaurant and gaming areas within your venue with a single integrated Loyalty system
- Assign points to loyalty members based on their membership type as defined in the back office software
- Redeem points for goods or services
- Make points balance enquiries in real time
- Each poker machine would have a loyalty node standing beside the poker machine recording the number of minutes each player spends on the machine and rewards them based on a points formula that can be set up at each venue
- Display the members name and current points when they insert their Members card.
- Place food or beverage requests from the device
- Members can call for staff assistance without leaving the machine
- Log a Jackpot win
- Special priority keys can be used for any specific requirement within the venue
- Device is listed as a "Till ID" when connected into QuestNet and configured like a till

Hardware Specification

- 2 line large character, LCD backlight display. 16 characters displayed per line
- 6 user definable buttons per membrane keypad
- Insertion style magswipe reader
- Up to 40 Loyalty Nodes per ICM50 over a maximum combined cable distance of 1km
- RJ45 socket for QuestNet connection

General Description

The Loyalty Node is used throughout venues with gaming facilities, enabling the member to accrue points whilst playing the pokies.

Configure your own points accrual structure, to be redeemed at any location within your venue.

Points are accrued on a time basis (per minute) whilst the loyalty members card is active in the magswipe of the Loyalty Node.

The Loyalty Node is displayed as a "Till ID" on the QuestNet network, and is assigned a location and a keypad to configure the device.
