- Currently supports up to 20,000 PLU's (10,000 standard memory model)
- Operates stand alone, via a modem or on-line as part of a store wide system
- Sleek, small footprint, self-contained, for instant deployment
- Full tilt display for maximum comfort and ease of use
- Robust steel framework for stability and strength, with negligible bounce

General Description

The V-touch is the ideal low cost touch screen point of sale terminal for fast food outlets, convenience stores, restaurants, sporting venues, retail outlets, franchise operations, general hospitality and many other POS applications.

V-touch is intelligent and does not rely on a permanent host computer connection for operation. All critical operations and peripheral devices are supported internally, thus providing security and peace of mind for users.

If a V-touch is running stand alone (via a modem, the host computer is being used for something else or there has been a computer or communications failure) full sales transaction data is stored in the V-touch and transferred to the host computer automatically, as soon as communications are established or restored.

Installation is simple and low-cost, using Category 5 twisted pair cabling. The Intelligent Control Module controls up to 32 V-touch or VersaTerms on a single daisy chained branch, which can run up to 1km from the host computer system, or alternatively the V-touch can connect to the host computer via modem.

V-touch and VersaTerm, VMR Series, VL Series and VM Series tills can be used together on the same installation.

Software Feature List

- Up to 20,000 PLU's
- 16 character PLU descriptions
- 20 shift modifiers
- Fractional PLU's
- 60+ different key functions
- 4 active, open & zero price levels, with automatic member pricing & up to 20 discount type price levels
